

Preparing Your Campus for Facebook Workplace – eduPersonPrimaryAffiliation

There are required attributes before your campus users can be loaded into the SUNY Learning Commons Facebook Workplace platform. Campus users must have **mail** and **eduPersonPrimaryAffiliation** populated. Currently, three affiliations are accepted: Faculty, Staff or Employee. Having **sn** and **givenName** populated is encouraged and will ensure their name is displayed properly inside Facebook Workplace.

Please make sure that the **eduPersonPrimaryAffiliation** and **mail** attributes are included in the campuses identity provider and that it is set up to send them when users log in through the SUNY federation. For further clarification, please contact secteam@suny.edu directly.

Workplace is not intended for student use or for those with any other campus affiliation. Teaching assistants and student employees are at the discretion of the individual campus and must be assigned an acceptable primary affiliation. If you have a specific questions (use cases, campus navigation, training, etc.) please email SUNYCommons@suny.edu.

You can find the complete [OIT Federation Services and Campus Onboarding Guide here](#) and the [table of which attributes are used for which services here](#).
