As Fredonia continues to expand its offerings of blended and online courses, and with the adoption of the flipped classroom model, the need to create and share quality online audio and video recording has grown. In addition, SUNY's initiative to create an Open SUNY will require more faculty to participate in multimedia creation. This grant will build a single Multimedia Recording Suite with the modern technology needed to create quality recordings. These recordings will be shared privately with students through our LMS and publicly in SUNY Fredonia's instance of iTunes U, YouTube and department blogs. The recordings will include tutorials and lectures created by the Professional Development Center as well as campus faculty on a wide range of topics related to teaching, learning and technical skills.
