What recommendations would you make to scale-up or share your project more broadly (within an educational sector, or perhaps SUNY-wide)?

We have been accepted as a Tier 3 IITG project for 2018-19 to implement the plans for an interactive portal and open resource repository on innovative projects across SUNY: Academic Sharing Community: A SUNY Catalog of Educational Projects and Innovative Initiatives (ASC SUNY). This should provide us with the ability to take the plans into a scalable project. Ongoing support of the project still needs to be determined.

If you would like to create a community of practice within the SUNY Learning Commons, please describe "members of your community" who would be most interested in your outcomes. Please be specific (e.g., math faculty, instructional designers, student services, registrars, administrators, accreditation or assessment specialists).

The Academic Sharing Community: A SUNY Catalog of Educational Projects and Innovative Initiatives (ASC SUNY) project will create a community of practice. This will include all SUNY faculty and staff who have or are working on innovation projects. In addition to being a community of practice, it will provide a searchable database of existing projects and guidance on developing proposals.

Do you intend to create an ongoing "Community of Practice" within the SUNY Learning Commons to continue work and dialog regarding this project?

Yes

Overall, how successful was IITG in meeting your project goals? (You may elaborate on your response in the final question if not addressed elsewhere.)

Extremely successful

Do you wish your current abstract to be used?

Yes
